

# Tabor Academy Marine Science Camp

## Day & Residential

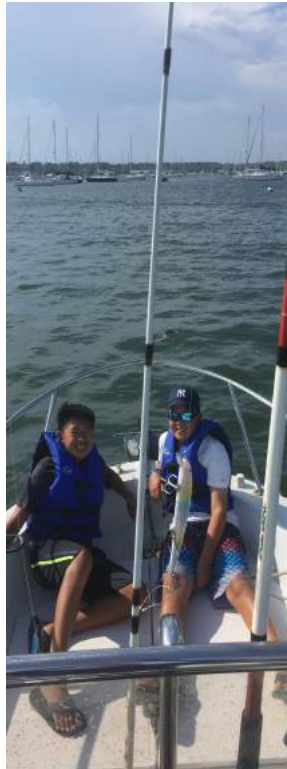

(7<sup>th</sup> to 10<sup>th</sup> grades)

August 7 – 12, 2017

The goal of the tabor academy marine science experience is to immerse yourself into the ocean environment for the purpose of exploration, education, and the development of global responsibility.

The program includes:

- Use of Tabor Academy's state of the art Marine Science Center.
- Instruction from passionate and experienced marine science instructors.
- Use of the fleet of boats available for marine science research.
- Access to dynamic ocean habitats including a whale watch on Stellwagen Bank and a field excursion to a rocky habitat on Cape Cod.
- Accommodations in a comfortable dormitory setting.
- All meals, with a variety of menus for varying diets.

A few things you will enjoy:

- Developing your own research project using the scientific method and our instructors for guidance.
- Observing the inhabitants of a multitude of habitats with snorkel, mask, and fins.
- Catching and identifying local marine life by harmless capture methods.
- Practicing chemical and physical sampling techniques to learn about the health of our ocean.
- Voyaging to Stellwagen Bank to witness the behavior of the large whale community.
- Navigating local marshes, rivers, and islands paddling in a kayak.
